IMPORTANT:

- For mobile presets, the ability to transfer DNG files from your laptop/desktop computer to your phone is necessary. IOS users can use methods like Dropbox, AirDrop, Google Drive, or other practical alternatives. Extract the zip files directly on your phone.
- If the resulting pictures appear too bright or dark after applying the preset, navigate to Lightroom's "light" section. Adjust the exposure, contrast, and shadow accordingly.

Usage Tips:

All presets have been pre-tested on various photos. Remember that each Lightroom preset works differently, as each photo is unique in color, light, exposure, etc. Use the preset as a starting point for working with an image, making minor adjustments to achieve the perfect settings.
