Blender Market - Clean Panels Pro v6.1.3:

Clean Panels Pro with Delayed Addon Loading is a powerful tool for Blender users, designed to optimize your workflow by allowing you to control when addons load, reducing startup times. With the "Delayed Loading of Addons" feature, you can choose which addons activate when Blender starts, enabling others only when needed, significantly speeding up your workflow. The tool also allows exporting a list of enabled and disabled addons for easy management.

- **N-Panel Filtering:** Categorize and manage your favorite addons with icons and enable/disable them directly from the viewport or a pie menu.
- **Drop Down Panels:** Pin your favorite tabs to the top bar for quick access, even if the addon is disabled in the current workspace.
- **PopUp Panels:** Access tabs and panels from a pie menu for a cleaner, more efficient workspace.

Compatibility and Support:

- Works with most operating systems and addons, though some limitations exist with certain dropdown and popup panels.
- Feedback from users is crucial for ongoing improvements, and support is available through their Discord server.

Additional Information:

- **RanTools (and P-Cutter) Addon:** Currently available at a 20% discount with new features like an HDRI Library, Fast Cutter Mode, and enhanced Cloth and Cable Simulations.

Note: This tool is not compatible with Blender installed via the Windows Store.
